Our offer – the most complete stack

The Trust Services & Security market is changing

Customer experience

is more important than ever

Security requirements are growing higher

secure storage for the user cryptographic credentials (keys/cert)

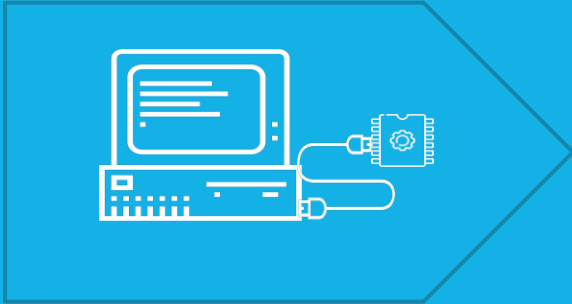

Users are looking for

reputable companies who can provide complete solutions

Users demand

mobile solutions

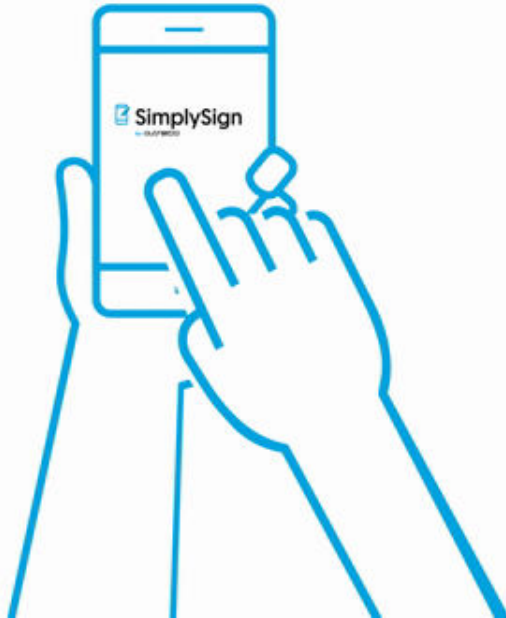

Trust Services & Security – a journey

Cloud is the next step in evolution of Trust Services

New solutions for Trust Services

SimplySign

is a platform created by  **Certum**
by asreco
for providing cloud-based Trust & Security services.

SimplySign addresses today's Customers' requirements in the most secure AND easy-to-use manner.

SmartPhone authentication – no need for Hardware Token or Card!	
Signing service – keys and user certificate are on virtual card on Certum HSM.	
Instant issuance process after verification – no need to ship hardware token to end customer.	
No risk of losing certificate with true sole control over private key.	
Multi-platform solutions – Windows, macOS, Linux, Android, iOS (no drivers needed).	
Highest security requirements.	

Certum SimplySign – by QSRTECO Future of Trust Services

You can use it for:

CodeSigning

Digital Signature for users and companies

Management of electronic Documents

API Trust Services

Verification of signatures and certificates

Time stamping

*and other Trust Services, which in the past required a
Hardware Token*

CodeSigning in the Cloud

Innovation on the global market!

High security solution in the Cloud –
faster and easier signing of code and applications.

SimplySign – the future is in the cloud

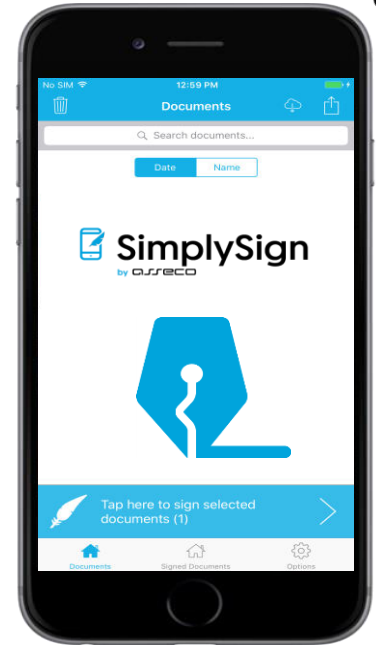

Ease of use
better Customer Experience

Flexibility
multi-platform
with mobile-app
authentication

Security
sole control with
two-factor
authentication
